

Amendments to the specification

Please amend paragraph [0009] on page 2 of the specification as follows:

At an end of the piston 10 are provided an inlet seat 22, an inlet check ball 14, a retainer 24 and a support spring 15. The inlet check ball 14 opens or closes an outlet of the inlet path 21 according to a position of the piston 10. The retainer ~~[[14]]~~24 and the support spring 15 bias the inlet check ball 14 to the inlet valve seat 22.
